Vitalii Rybachenko

Full Stack Developer

Male, 28
11 years experience

I'm an experienced full stack web developer and, in addition, developing iOS and Android applications from time to time. I have a solid understanding of algorithms and data structures and an experience in building scalable low-latency systems from scratch.

Well motivated, have good self management and remote working skills, always opened for something new. Attended to various conferences in Ukraine, had experience to be speaker on few of them.

Contributing and maintaining some open source libraries.

Experience

Stackbit — Senior Fullstack Developer — Remote

May 2019 - Present

Development of the JAM integration platform between different static site generators and content management systems, using themes which are developed either for specific site generator or in universal template format Unibit, which can be transpiled to any supported site generator.

MyHeritage — Senior Web Developer — Lviv, Ukraine

August 2018 - October 2018

Development new family home page as single page application using React, Redux, GraphQL. Continuous integration with every hour releases to production, writing unit tests covering code for new application.

Sprut.ua — Founder & Developer — Vinnytsia, Ukraine

April 2017 - February 2020

Started from creating small iOS application for ordering taxi in my local city, grown up to big project with thousands of active users, spreading to other cities and constantly increasing app features.

Clio Online (Ciklum) — Senior Web Developer — Vinnytsia, Ukraine

May 2015 - July 2018

Development and supporting biggest in Denmark learning management system, which contains a lot of subprojects for various types of schools. Also, launched in Sweden and there are plans to grow for other countries. Two offices, in Copenhagen and in Vinnytsia, a lot of remote work and communication. My main goal in the team to be an expert guy in frontend, making decisions in choosing technologies, bootstrapping new projects and solve issues in old ones.

EPAM — Senior Web Developer — Vinnytsia, Ukraine

July 2014 - May 2015

Development of modules and components for project running under Adobe Experience Manager CMS (ver. 6) for world-known company. Creating various components to be used on the page in the browser or/and in the email clients.

Win Interactive (ex. Orneon) — Web Developer — Vinnytsia, Ukraine

July 2011 - July 2014

- Development of browser-based real-money HTML5 blackjack game. Framework adaptation from platformer-games to casual-games.
- Development of browser MMORPG. Creating web services which handle authentication, deployment and testing.
- Development of mobile version of the game. Creating map tiles generator.

Freelance — Web Developer — Vinnytsia, Ukraine

October 2010 - July 2011

Working as a freelancer on different projects. Worked both on frontend and backend parts.

Education

Vinnytsia National Technical University — BSc and MSc Degree

2011 - 2015

Faculty of Computer Systems and Networks, Systems engineer in computer systems and networks.

Etc

Programming is big part of me, that's why it is my work and, in the same time, my hobby. Self-learner, started from the scratch and got everything by my own.

Love to travel, when I'm seeing the world it inspires me. Usually read technical books, but also love to dive into fantasies, like the world of Middle-earth or Forgotten realms or Tamriel - but the last comes from the The Elder Scrolls games.

Pretty heavy "pro" gamer, but in a past. Still frequently playing PC/PS games, but not having as much time as before. Love to think if it wasn't IT - would definitely become cybersport player.

Like to drive anything has wheels - bicycles, cars, small planes.
